Compulsory Assignments

All teaching sessions (Lectures) hold a compulsory assignment (Exercise).
It is important that you give priority to work with these exercises – in the exercises you learn coding and programming.
You are therefore expected to work solidly with the exercises.

It is mandatory to meet deadline regarding all assignments
Deadline is often right before the start of the subsequent lecture.
Hand-in of assignments takes place on Fronter. You are *not* expected at all times to have solved all parts of the assignments.

There are seven compulsory assignments in all.
